TIVONIQ logo

Construction, proportions and use. Every dimension comes from the stroke **t**; the grid unit u is t/10.

CONSTRUCTION

- **Stroke t** — crossbar height, stem width and the right arm's perpendicular width.
- **Left arm 1.2t** — it carries the T's stem, so it is drawn heavier.
- **All diagonals 60°** — both crossbar ends, both arms of the V, the stem's bend.
- **Two radii, 1:2** — 0.4t on the crossbar's obtuse corners, 0.8t on the stem bend and the V point. Acute corners stay sharp.
- **Fold** — the right arm ends in a round cap of radius t/2, centred level with the inner vertex; the cap lands exactly tangent to the left arm.
- **Data pixels** — six true squares on the 1u grid, sizes 2u, 3u and 4u (2:3:4). The notch in the right arm is one 3u pixel.
- **Mark** — 68u × 62u (aspect 1.097 : 1).

WORDMARK

- Drawn letters, one stroke weight (0.18 of the cap height).
- O and Q are rounded rectangles, outer radius 0.43 of the cap height.
- The Q's tail runs at 45°, with a knock-out on its left side.
- Q in teal, the rest in navy.

LOCKUPS AND CLEAR SPACE

Stacked (primary). Wordmark cap height 1.4t, 0.75t below the mark, mark centred. Clear space: 2t on every side (dashed).

With tagline. Tagline set in Inter Regular, 1t below the wordmark and exactly as wide as it.

Horizontal. Wordmark cap height 2t, 1.5t from the mark, centred on the T–V body (the pixels rise above).

Mark alone: app icons, favicons, avatars.

COLOUR

Navy
`#072658`
Wordmark, tagline, one-colour logo

Teal
`#08B9B2`
The Q

Arm gradient
`#068EB5` → `#04D7B3`
Right arm over the fold

Pixel gradient
`#0391B6` → `#05CBB1`
The six data pixels

VERSIONS

Full colour on white or light backgrounds. White on navy, photos or any dark colour. One-colour navy (or black) for print, stamps, engraving and embroidery; the one-colour mark keeps 0.08t gaps between the T, the V and the fold.

MINIMUM SIZE

Mark 24 px / 6 mm wide · Stacked 96 px / 20 mm · With tagline 160 px / 35 mm · Horizontal 140 px / 30 mm. Below these, drop the tagline first, then use the mark alone.

DON'T

- Stretch, skew or rotate the logo; scale it only proportionally.
- Redraw, re-space or retype the wordmark.
- Recolour parts, or put the colour logo on a busy or mid-tone background (use white).
- Add shadows, outlines or glows.
- Crowd it inside the clear space.
